WHAT IS AN APPRENTICESHIP PROGRAM?

Apprenticeship is not just a job, but a career opportunity! It is an occupational training that combines supervised on-the-job training experience with classroom instruction.

Apprentices usually begin at half the salary of journey workers. Apprentices receive pay increases as they learn to perform more complex tasks. When they become journey workers, they increase their chances of finding a well-paying job in industry and may become supervisors or go into business for themselves.

Apprentices can also earn credit towards an associate degree at a community college for classroom hours or for the completion of an apprenticeship program.

WHAT DO CLASS A & CLASS B TECHNICIANS DO?

Limited energy technicians install, troubleshoot, maintain, replace & repair electrical systems under 100 volts.

Class A & Class B Technicians can work on the following systems:

Audio/Visual, Data Communication, Programmable & Controlling instrumentation, Structured Wiring, Sound & Public Address, and Specialized Control

Class A Technicians can also work on the following systems:

Fire Alarm, Burglar Alarm, Closed-Circuit Television, Access Controls, Nurse Call & Emergency Call

HOW MUCH CAN I EARN?

It can vary from industry to industry, the average starting wage of an apprentice is about 50% of an average journey workers rate of pay. Apprentices usually earn a 5% to 8% raise every six months if training and school performance is satisfactory.

Entry Level Applicants Earn \$13.68—\$14.68 per hour to start.

Licensed Journey workers can advance to \$27.35– \$29.35 per hour.

WHAT TYPE OF EXPENSES SHOULD I EXPECT?

Related training tuition and books cost is approximately \$1200 – \$1500 per year. This cost is the responsibility of the apprentice to pay. The colleges do have financial aid available and some training agents assist with related training expenses.

WHAT IS THE LENGTH OF THE LIMITED ENERGY PROGRAM?
